The industry's first, cumulative issued e-Tax bills exceeded

500,000,000 Issues

Account receivable factoring Service _ Government-designated innovative financial services

Tax invoices generated from intercompany transactions will be carefully evaluated using the AI credit evaluation model developed by DOUZONE. Afterwards, trade receivables are purchased from financial institutions at a certain discount rate. The accounting receivable factoring service has the advantage of making it easier for both vendors and purchasing companies to manage their funds. Since it is a sale of held bonds, not loans, there is no increase in debt and there is an improvement in credit rating.

- Because there is no right to claim repayment, the seller is not responsible if the buyer fails to pay for the goods.
- It has developed an AI credit evaluation that utilizes real-time accounting big data.
- You can apply for factoring at the same time as you issue an electronic tax invoice.
- Just agree to use accounting information and the preparation process for applying for factoring will be completed.

e-FAX_ e-Fax solution enhances both the convenience and security

DOUZONE, who has the rich experience of building and operating systems and the technology validated by domestic and international patents, provides electronic fax solution which is optimized for the customer's business environment.
